# Learning & Management System (LMS & LXP)

Provide a wide range of high-quality training resources to help employees achieve continuous learning and professional development.

## These resources include:

Courses from various fields

Certifications from certified trainers

Make and upload company-specific courses

ensuring that your employees receive the training they need.

## Interactive Screens

Smart screens with features that enhance communication, productivity, and interactive learning experiences.

Wireless connection from the laptop to the screen without the need to use wires, speakers with clear sound, a high-quality microphone, and the ability to take notes with a pen during the presentation.

# School Management System (SMS)

An integrated and comprehensive administrative system controls all departments' management:

Personnel Management

School Bus Management

School Accounts Management

Student Affairs Management

School Warehouse Management

and many features for successful school administration.

## MSP for Schools

Provides comprehensive IT solutions and support.

We manage your technology infrastructure, software, and security.

### Solutions:

- Centralizing Data Management
- Streamline Communication
- Improved Security and Compliance
- Microsoft 365 license and training

## Hardware and Licenses

Provide you with a wide range of devices, licenses, and subscriptions tailored to your specific requirements.

Laptops

Smart screens

Tablets for students

Charging solutions for iPads, tablets, and laptops - Licenses and subscriptions to support your educational facility.

## Microsoft Education Solutions and License

Provide you with Microsoft 365 Education to improve productivity and enable the creation of better learning environments.

## Computer Labs and Training Center Technology Preparation

Design and build computer labs and training centers, including IT infrastructure tools, and devices, to ensure efficient operation.
